Products Used: Craft-Maid Cabinetry, ¾-inch Lucerne applied molding, cherry stain and sand thru (dark stain); Calcutta Gold marble countertops (1¼-inch) and flooring; Jado faucets, Swan Roman tub set.

Photography: Peter Rymwid

This master suite began as a maze of small rooms within the master bathroom. The designer made the room into a large bathroom with the toilet and bidet taking up a 5-by 5-foot area in the corner. This allowed for a larger area that enabled the designer to create an oversized his and her vanity, a tall wire meshed cabinet for towel and bath supply storage, a luxurious shower area (seen in mirror), and an ideal location for a freestanding soaking tub.

The marble floor was installed on a diagonal and sports a mosaic border

around each tile. The embossed wall tile, set at the European height, becomes more pronounced when the light illuminates it.

A wall-mounted TV was located where it could be enjoyed from either the soaking tub or the bathroom vanity. Another luxury is a towel warmer to keep towels at a perfect temperature. His and her closets are directly behind the master bathroom. This is an ideal location for this couple, as they don't have far to go to get ready for their new day.
