

High-gloss.
Surfaces with depth.

RAUVISIO BRILLIANT

Mirror High-gloss Acrylic Surface

RAUVISIO brilliant™ offers the highest quality in high-gloss. Our components feature double-sided high-gloss with matching mirror-gloss edgeband. The high-gloss acrylic surfaces are laminated onto super refined MDF using PUR glue in a clean room environment to ensure a mirror-like reflective quality.

20+ years of UV resistance

**Board Specifications**

RAUVISIO brilliant is flat laminated to a high-quality, super-refined engineered MDF core. An engineered core provides a stable, consistent substrate which virtually eliminates warping.

Edgeband Specifications

All components are edgebanded with REHAU LaserEdge, which provides a seamless joint that is extremely heat and moisture resistant. The result is a seamless board that rivals solid surfaces and exceeds high-end lacquered finishes.

Cleaning and Care

Clean with a damp microfiber cloth and with a mild soap if needed. Do not dry-wipe the acrylic finish. Avoid abrasive cleaners, solvent based cleaners and harsh chemicals. Do not use paper towels, brushes or scouring pads. REHAU is not responsible for any damage done by abrasive cleaning products or procedures.

Protective Coat

A protective peel coat is applied to the top of the high-gloss surface, as well as to the edgebanded sides. Do not expose peel coat to direct sunlight before removal. Remove promptly after installing cabinet but prior to mounting decorative hardware. To remove peel coat, use rubber fingertips or our peel coat removal tool.
